PROFILE

Organized and detail-oriented Information Technology graduate with experience in software development, academic leadership, and administrative coordination. Demonstrated ability to design and implement technology-enabled solutions, manage workflows, and support stakeholders within institutional and business environments. Recognized for effective communication, reliability, and a systematic approach to delivering scalable digital solutions and improving operational efficiency.

EDUCATION

University Of Energy And Natural Resources Sunyani 	01/2021 – 2025
<i>Bachelor of Science Information Technology</i>	Sunyani, Ghana
CGPA -First Class(3.60/4.0)	
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks, Software Engineering, Web Technologies, Operating Systems, Data Science,Data privacy and security, Digital forensics	

PROFESSIONAL EXPERIENCE

Really Great Tech(RGT)	11/2025 – Present
<i>Mobile & Full Stack National Service Personnel</i>	Ghana
Serve as a National Service personnel, contributing to the development and maintenance of mobile and full-stack applications. Assisted in designing user interfaces, implementing backend functionalities, and testing software to ensure smooth performance and usability	
Gnik Restaurant 	10/2023 – 12/2024
<i>IT lead</i>	Accra, Ghana
• Developed and deployed the company's responsive website using HTML, CSS, and JavaScript, increasing online customer engagement and orders. • Implemented and managed a Point-of-Sale (POS) system, streamlining sales tracking, inventory management, and end-of-day reporting. • Provided technical support and troubleshooting for all hardware and software systems, ensuring minimal downtime.	
Codedtechs.com 	2024
<i>Founder of CODEDTECHS</i>	Remote, Ghana
• Led a cross-functional team in the design and development of software solutions for clients using Flutter and Firebase. • Architected full-stack applications, delivering projects that met client specifications and deadlines.	

- Real-world application of software solutions for housing, waste management, and automation

Better World Ghana

2022 – 2023

Interim IT Assistant Technician

Accra, Ghana

- Provided technical support to staff, resolving hardware and software issues to maintain productivity.
- Assisted in maintaining the organization's computer systems and network infrastructure.

Griffshot Event Hub

2021

Operations, IT and Marketing Lead

Accra, Ghana

- Managed operational workflow for event planning and execution.
- Developed digital marketing strategies and managed social media presence.
- Maintained IT infrastructure for the business.

De-Aim High International School

07/21 – 01/2022

Tutor

Accra, Greater Accra

Tutor for Low Junior and Upper Junior
Computing, Maths and Science

SKILLS

Frameworks & Libraries

Flutter, Bootstrap, TensorFlow Lite

Web Technologies

REST APIs, Responsive Web Design

Cybersecurity & Pentesting:

Kali Linux, Nmap, Burp Suite, Wireshark, Metasploit, Hydra (brute-force), VPN Configuration, TOR Browser anonymity, Network Scanning & Enumeration, Web App Pentesting (XSS, SQLi basics), Bash automation scripts, Vulnerability Assessment

Cloud & DevOps

AWS (EC2, S3, IAM), LEMP Stack (Linux, Nginx, MySQL, PHP), LAMP Stack (Linux, Apache, MySQL, PHP), Bash Scripting, Linux System Administration

Tools & Platforms

Git, Visual Studio Code, Android Studio, Kali Linux

Teaching

Computing, Maths and etc

Databases & Backend Services

- **Languages:** JavaScript, TypeScript, Python
- **Frameworks & Runtime:** Node.js, Express.js
- **Databases:** SQL (PostgreSQL, MySQL), NoSQL (MongoDB)
- **Other Technologies / Concepts:** RESTful APIs, , JWT Authentication

Embedded & Intelligent Systems

System-level design, optimization, intelligent automation

PROJECTS

Mine Track Assets Management System

04/2026 – Present

Industrial Asset Tracking Platform

Developed an asset tracking and monitoring system designed for industrial and mining environments. The platform allows organizations to manage equipment, track asset usage, and monitor operational performance through a centralized dashboard.

Key Features:

- Asset tracking and monitoring
- Equipment inventory management
- Reporting and analytics dashboard
- Admin management system
- Role-based access control

Technologies: React, Node.js, Express, PostgreSQL

Real Estate Management System

03/2026 – 03/2026

Enterprise Property Management Platform

Designed and developed a comprehensive real estate management system for managing properties, tenants, payments, and operational reporting. The system enables property managers to track property listings, tenant records, and generate reports efficiently.

Key Features:

- Property management
- Tenant management
- Payment tracking
- Reporting dashboard
- Admin control panel

Technologies: React, Node.js, Express, PostgreSQL

Bena E-Commerce Platform — Full Stack Web Application

03/2026 – 03/2026

Developed a full-featured e-commerce platform enabling product management, customer browsing, cart functionality, and order processing. The system includes an admin dashboard for managing products, categories, inventory, and customer orders.

Key Features:

- Product catalog and categories
- Shopping cart and checkout
- Order management system
- Admin dashboard
- User authentication

Technologies: React, Node.js, Express, PostgreSQL / MongoDB

Movie Streaming Application

02/2026 – 02/2026

Fully cloud and full stack application

Developed a mobile application for streaming movies, allowing users to browse, search, and play video content seamlessly. Built the backend using Node.js and Express.js, hosted on AWS EC2, with AWS S3 for video storage and PostgreSQL/MongoDB for data management. Implemented user authentication and role-based authorization, enabling authorized users to upload videos for streaming, while ensuring optimized performance and secure access.

Mobile Bean Doctor Detector

01/2026 – 01/2026

Mobile application to detect bean crop and the disease affected by the crop

Developed a mobile application with large set of data, as well as fine tuning model to allow users, take snap of bean crop leave to detect if truly its a bean crop and as well check the disease associated with the bean leaf crop

Mobile Chat Bot <i>Using Context and API Creation</i> Creating customized ChatGPT app for institution , hosting and deploying api and backend on cloud	01/2026 – 01/2026
Production Hostel Management System <i>Westervillehostel</i> Built a web application to manage hostel operations, including room allocation, resident tracking, and payments. Built the frontend with Flutter and the backend using Node.js and Express.js, with PostgreSQL and MongoDB for data management. Integrated authentication, role-based access, and automated notifications to improve usability and efficiency	12/2025 – 12/2025
Diabetees Eye retino Detection <i>Developed a Flutter mobile app that analyzes eye scans using an AI model to predict diabetes risk, with real-time health advice via prompt engineering. Integrated Python-based ML (TensorFlow) via Flask API for seamless predictions and Firebase for secure user data storage. Enhanced patient awareness through personalized recommendations and intuitive UI.</i>	2025 – Current
Final Year Project: Accommodation System: <i>Final Year Project: Student-Landlord Housing Portal (Flutter) Developed a cross-platform app with role-based access (students/landlords), enabling property uploads (admin-verified) and bookings. Used Flutter, Firebase, and Provider for secure authentication, real-time data, and state management. Enhanced rental transparency and efficiency through a streamlined verification and search system.</i>	01/2025 – 07/2025
Deployment of full LEMP Stack on AWS EC2 <i>LEMP Stack Deployment on AWS EC2 Configured and deployed a scalable LEMP (Linux, Nginx, MySQL, PHP) stack on AWS EC2, ensuring high availability and secure data handling. Automated server setup with Bash scripting and implemented SSL/TLS encryption via Let's Encrypt. Optimized performance through Nginx caching and MySQL tuning for efficient web application hosting.</i>	04/2025 – 06/2025
Deployment of LAMP(Linux, Apache, MySQL,PHP) <i>LAMP Stack Deployment on AWS EC2 Designed and deployed a secure LAMP (Linux, Apache, MySQL, PHP) stack on AWS EC2, enabling robust web application hosting. Configured Apache for optimal performance, hardened MySQL security, and automated deployments with Bash scripting. Implemented monitoring and HTTPS encryption via Let's Encrypt for production-ready reliability.</i>	04/2025 – 06/2025
Beauty Studio Website  <i>Website for clients beauty saloon https://evelinks.netlify.app/</i>	2024 – 2024
Gnikfoods Restaurant Website <i>Restaurant website https://gnikfoods.netlify.app/</i>	2023 – 2024

Ethical Hacking & Mobile Phishing and listening app (2023)

Remote Digital Forensics & Lawful Investigative System (, 2024) Worked with a team to design and prototype a remote digital forensics and lawful investigative system intended for authorized state security and national defense operations. The platform enables certified investigators—under legal mandate—to conduct remote evidence collection, event monitoring, and system-level behavior analysis during cybercrime investigations and national security incidents.

RESEARCH INTERESTS
— Privacy-preserving AI • IoT & cyber-physical system security • Explainable AI & threat intelligence • Cloud Engineering(aws) • Devops(Command Interface automation with virtual machies) • Mobile and Web software developement • AI applications and usage

COURSES/CERTIFICATES	
AWS Certified Cloud Practitioner <i>Simpli Learn Cloud Practioner Training. Globally recognized AWS cloud practitioner master certification</i>	2025 – present Sunyani, Ghana
Getting Started with AWS <i>Simpli learn</i>	(2025) present
Basic Cloud services <i>Simpli Learn</i>	2025 – 2025 Sunyani, Ghana
I.T.S 2024 Bootcamp participation certificate <i>(Web developement)</i>	2024
I.T.S 2022 Bootcamp participation certificate <i>(Cyber security-Pentesting) using Kali linux</i>	
2022 – I.T.S Cybersecurity & Penetration Testing Bootcamp <i>University of Energy and Natural Resources</i> Hands-on penetration testing training: Nmap scanning, TOR/VPN network privacy, brute-force scripting, basic exploitation, web app security testing, and ethical hacking with Kali Linux.	

LEADERSHIP AND AWARDS	
Student Representative Council General Secretary: UENR SRC <i>University of Energy and Natural Resources Sunyani</i> 2024-2025 Administration	2025

Student distinctions, GPA 4.0 for 2025 first semester <i>Department of Information Technology and Decision Sciences</i>	2025
Best Performing and Hardworking Executive <i>Department of Information Technology and Decision Sciences:UENR Tech Fair</i>	2024
Department President <i>Department of Informaton Technology and Decision Sciences</i>	2024
Course Representative <i>Department of Information Technology and Decision Sciences</i> IT Level 200, year 2021-2025 group	09/2023
AGCM UENR Organizing Secretary <i>AGCM</i> AGCM UENR Deputy organizer
